

Üniversitemizin abone olduğu elektronik veri tabanlarını tanıtmaya devam ediyoruz. Amacımız veri tabanlarının daha etkin kullanımını sağlayarak daha fazla yararın sağlanmasıdır. Bu sayımızda da çok yararlı olduğuna inandığımız **Wiley InterScience** veri tabanı hakkında bilgi vereceğiz.

Wiley InterScience, 300’ün üzerinde önde gelen bilimsel, teknik, tıbbi ve mesleki konularda tam-metin dergi olanağı sağlayan bir online hizmeti sunmaktadır. Ayrıca, başlıca referans eserleri, tanınmış Current Protocols laboratuvar el kitapları ve hatta tam metin Wiley basım kitaplar da yer almaktadır. Tam içerik erişimi, lisanslı kurumsal müşteriler ve onların kullanıcılarıyla sınırlıdır. Bireyler ya da mesleki topluluk veya dernek üyeleri de bazı yayımlar için lisans alabilirler.

Kullanıcılar, dergilerin “içindekiler” ve “özet” (abstract) kısımlarına sınırsız erişebilirler ya da arama motorundan yararlanabilirler. Kayıtlı kullanıcılara, özelleştirilmiş e-posta mesajları, arama bilgileri, beğenilen dergi ve makale bağlantıları için bir “Kişisel Sayfa” verilir. Ayrıca, kayıtlı kullanıcılar, örnek dergi sayılarını görebilir ve referans eserlerinden seçilen materyali ön izleyebilirler. Lisanslı müşteriler, PDF formatında dergi makalelerine tam-metin ulaşabilirler; bazı dergiler tam-metin HTML erişimi de sunmaktadır.

Wiley InterScience’ın özellikleri:

- **Wiley InterScience** mesaj hizmeti, bir derginin yeni çıkan sayısının “içindekiler” tablosunun e-posta yoluyla kullanıcıyı ulaştırılmasıdır.
- **EarlyView**, dergi sayısı henüz çıkmadan bile, hazır olan makaleleri görebilme olanağı sağlar.
- **CrossRef**, okuyucuları, bir makaledeki referanstan kaynak gösterilmiş bir yayıma kolayca geçmeyi sağlayan bir çoklu-yayımcı referans bağlantı sistemidir.
- **Mobile Edition**, PDA kullanıcılarını, Wiley’nin en saygın dergilerinden en son duyurularla bilgilendirir.
- **ArticleSelect**, EAL müşterileriyle bağlantılı kullanıcılara, üyelikdışı makale erişimi sağlar.

Üniversitemiz **Wiley InterScience** veritabanının Süreli Yayınlar (Journals) kısmına abonedir.

The Impact of the Internet on Public Library Use: An Analysis of the Current Consumer Market for Library and Internet Services

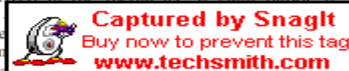

George D'Elia, Corinne Jörgensen, and Joseph Woelfel
School of Informatics, 528 Baldy Hall, State University of New York at Buffalo, Box 601020, Buffalo, NY 14260-1020

Eleanor Jo Rodger
Urban Libraries Council, 1603 Orrington Avenue, Evanston, IL 60201

The potential impact of the Internet on the public's demand for the services and resources of public libraries is an issue of critical importance. The research reported in this article provides baseline data concerning the evolving relationship between the public's use of the library and its use of the Internet. The authors developed a consumer model of the American adult market for information services and resources, segmented by use (or nonuse) of the public library and by access (or lack of access) to, and use (or nonuse) of, the Internet. A national Random Digit Dialing telephone survey collected data to estimate the size of each of six market segments, and to describe their usage choices between the public library and the Internet. The analyses presented in this article provide estimates of the size and demographics of each of the market segments; describe why people are currently using the public library and the Internet; identify the decision criteria people use in their choices of which provider to use; identify areas in which libraries and the Internet appear to be competing and areas in which they appear to be complementary; and identify reasons why people choose not to use the public library

heard question in the last few years has been: "In this age of the Internet, will we still need libraries? What roles will/should libraries play in the 21st century?" Library administrators, managers, and other library personnel are thoughtfully aware of these issues as well and share in such discussions privately and within the library community. These questions reflect the assessment that the libraries of today and the future may very well be facing a critical competitive force in the Internet, as more and more information and a variety of other materials (both textual and multimedia) become available on the Web. In fact, the Internet is frequently characterized in the media as "a giant public library" (e.g., Nie et al., 1998). The Internet, however, is not a replacement of the Internet, but a complement to it. The potential of the Internet in public libraries is a complex issue with many pressures.

Responses to these questions among professionals are
